MATTHIEU ROLLAND, PHD

SCIENTIST | ENVIRONMENTAL EPIDEMIOLOGIST | BIOSTATISTICIAN

Mathematical Modeling Engineer and Epidemiologist with 15+ years of experience in environmental health (Inserm, WHO, UCSD). Specialized in the **exposome and childhood health**, I focus on translating high-dimensional data into **evidence-based public health policy**. Expert in reproducible research and international cohort harmonization.

EXPERIENCES

2018 | today

Senior Research Biostatistician

INSERM (U1209 - Team ERES) — Grenoble, France

- Led the scientific harmonization and analysis of high-dimensional data for major international cohorts (**SEPAGES, HELIX, ATHLETE**).
- Developed the **{preprocess}** R package to standardize environmental data cleaning across international research consortia.
- Published first-author research in high-impact journals (**The Lancet Planetary Health**) on chemical exposome and child development.
- Supervised PhD students and promoted **Open Science** and rigorous reproducible workflows.

2022 | 2023

Research Data Scientist (Consultant)

World Health Organization (WHO) — remote

- Methodological lead for the **O2COV2 project**: Prepared technical reports and manuscripts published in **The Lancet Global Health**.
- Presented analysis results to 100+ international hospital directors to inform global clinical guidelines.
- Pioneered the **WHO Global Clinical Data Platform** using standardized reproducible pipelines.

2020 | 2021

Project Manager

R Epidemics Consortium (RECON) — remote

- Coordinated global teams to deploy collaborative platforms for field epidemiologists.
- Integrated Trello/GitHub workflows to streamline software development and field needs.

2013 | 2018

Statistician & Data Scientist (USA & France)

UCSD, CNRS, CareFusion — California / France

- **4 years in the USA**: Neurosciences, teratology cohorts, and private sector analytics.
- **CNRS**: Lead statistician for randomized controlled trials in neuro-cognition.

2009 | 2012

Environmental Health Epidemiologist

Santé Publique France (InVS) — Paris, France

- Investigated reproductive health trends using **FIVNAT registry data** and advanced **spatiotemporal models**.

EDUCATION

2025 — **PhD in Applied Statistics for Epidemiology**
Université Grenoble Alpes — Grenoble, France

2011 — **Field Epidemiology Training Program (PROFET)**
Santé Publique France — Saint Maurice, France

2009 — **Applied Mathematical Modelling Engineer**
INSA Toulouse — Toulouse, France
Specialised in biostatistics.

SELECTED PUBLICATIONS

Prenatal phenol exposure and child behaviour: insights into the hypothalamic–pituitary–adrenal axis from two prospective mother–child cohorts
M Rolland et al.; *The Lancet Planetary Health*, 2025

Exposure to phenols during pregnancy and the first year of life in a new type of couple-child cohort relying on repeated urine biospecimens
M Rolland et al.; *Environment international*, 2020

Decline in semen concentration and morphology in a sample of 26 609 men close to general population between 1989 and 2005 in France
M Rolland et al.; *Human Reproduction*, 2013

SKILLS & STRENGTHS

Expert R / Tidyverse
Reproducible Research
AI-Assisted Workflow
Complex Stats (Bayesian, ML, Geospatial)
Field Epidemiology
Bilingual English

INVOLVEMENT

Coordinator of the Grenoble R User Group for 3 years
Member of RECON
Instructor at UGA & Applied Epi
